EXPERIMENT – 8

Name: Harini Nagarajan Roll Number: 240701167

AIM:

The aim is to create storyboards representing the user flow for a mobile food ordering application (Quick Bite) using Balsamiq.

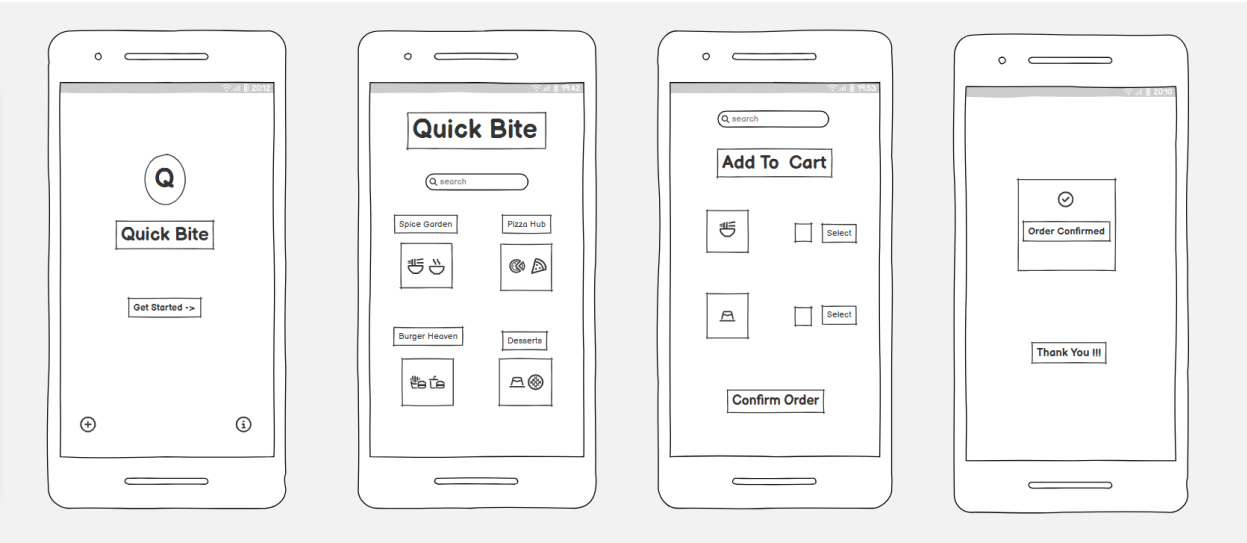
PROCEDURE:

- Tool Used: Balsamiq Wireframes (https://balsamiq.com)
- A new project was created and mobile wireframe screens were added to represent the user journey.
- Each screen was designed to simulate a step in the food ordering process, from app launch to order confirmation.
- UI components such as buttons, search bars, restaurant cards, and selection options were used from Balsamiq's library.
- The design focuses on a simple, modern, and user-friendly interface with a clear navigation flow.

USER FLOW:

- Welcome Screen – User opens the app and clicks on “Get Started.”
- Restaurant Selection Screen – User browses available restaurants such as Spice Garden, Pizza Hub, Burger Heaven, or Desserts.
- Menu / Item Selection Screen – User views items, selects desired food options using checkboxes.
- Order Confirmation Screen – User confirms the order and receives a success message.

WIREFRAME STORYBOARD:



SCREEN-WISE EXPLANATION

1. Welcome Screen

Components:

- App logo with “Q” icon and “Quick Bite” branding
- “Get Started ->” button
- Bottom navigation icons (add/info)

Purpose:

Acts as the entry point of the application, allowing users to begin their food ordering experience.

2. Restaurant Selection Screen

Components:

- App header with “Quick Bite” title
- Search bar
- Restaurant category cards:
    - Spice Garden

- Pizza Hub
- Burger Heaven
- Desserts

Purpose:

Helps users choose the type of food or restaurant they want to order from.

3. Item Selection & Cart Screen

Components:

- Search bar at top
- “Add To Cart” button
- Food item icons with selection checkboxes and “Select” buttons
- “Confirm Order” button

Purpose:

Allows users to select food items from the menu using checkboxes and proceed towards placing the order.

4. Order Confirmation Screen

Components:

- Confirmation card with a checkmark success icon
- “Order Confirmed” message
- “Thank You!!!” acknowledgement text

Purpose:

Final screen that confirms the successful placement of the order and thanks the user.

RESULT:

Successfully created storyboard wireframes representing the user flow of a mobile food ordering application (Quick Bite) using Balsamiq. The design clearly

illustrates the navigation from appentry through restaurant selection, item selection, and finally to order confirmation.
